## About Me

I'm Projoy Naidu, a passionate Frontend Developer with hands-on experience in building modern, responsive web applications using HTML, CSS, JavaScript, React, and Angular. I enjoy creating clean UI/UX designs and writing code that works well across devices and browsers.

I've worked on multiple freelance and personal projects, especially focused on React.js and Tailwind CSS, and I'm currently enhancing my backend skills with Node.js, MongoDB, and Firebase. I'm also diving deep into Data Structures and Algorithms using JavaScript to strengthen my problem-solving skills.

My goal is to grow as a developer by contributing to innovative projects, collaborating with global teams, and continuously learning new tools and technologies. I enjoy remote work culture and love building things that solve real problems.
